

Table 1. Distribution (%) of diabetic and non-diabetic postmenopausal women according to the number of affected vessels (0, 1, 2, 3) with more than 50% stenosis in the angiography (Pearson's chi-square test, p= 0.019)

	0 vessels	1 vessel	2 vessels	3 vessels
Women with diabetes (n=44)	11/44	8/44	10/44	15/44
	25.0%	18.2%	22.7%	34.1%
Non-diabetic women with fasting glucose levels 5.5-6.9 mmol/L (100-125 mg/dl) (n=50)	18/50	11/50	18/50	3/50
	36.0%	22.0%	36.0%	6.0%
