

Table 2. Characteristics of multinodular thyroid glands (MNTG) in 16 children and adolescents.¹⁰

MALIGNANT MNTG (25%)

• thyroid carcinoma	4
---------------------	---

BENIGN MNTG (75%)

• benign isolated MTNG	3
• benign MTNG with cystic renal disease and polydactyly	3
• benign MTNG with McCune-Albright syndrome	2
• benign MTNG after previous neck-irradiation	1
• Hashimoto's thyroiditis	3
